ELECTION OF SPECIES

Sir:

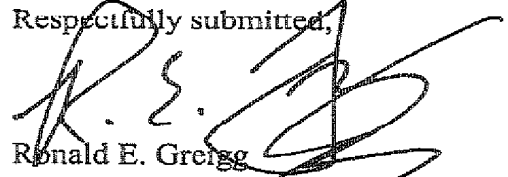

In response to the restriction requirement made in the Office action mailed September 10, 2008, the applicants elect the species shown in Figures 2 and 3 for examination. Claims 1-7 and 11 are readable on the elected species.

This election of species is made with traverse. Only three embodiments of the invention are illustrated in applicants' drawings, namely, Figs. 2-3, Figs. 4-5, and Fig. 6. Each of these illustrated embodiments belongs to one common invention and has a common feature, namely, adjacent coils on adjacent pole teeth are connected via a contact bridge between the collector laminates. Thus, withdrawal of the election requirement is requested.
